you will learn WhatsApp,
the app that did more to
change the world than
any other social app
before it. Until the advent
of Facebook, Chat had
long been king of the
social network. This was
primarily thanks to the
well-known ability to send
text messages using a

user interface similar to the one we use on every other device, including our smartphones. It's not hard to see why; of all the software that we use to communicate, it's the smallest, most user-friendly and convenient of all of them. It makes sense, then, that companies would flock to it as their primary tool for messaging, as the

demand to use it grew. But it wasn't until WhatsApp was released, along with iOS and Android version of it, that Chat just clicked with users, and we all had a reason to start using it again. Above: Early Telegram, WhatsApp, and Facebook Messenger apps

----- WhatsApp for
iOS was released in
February 2009. A year
earlier, the company that
made it was still in its

youth, having not released any apps. Back then, the app was a stripped-down version of another one called Jott, created by Palm Inc. and co-owned by Apple. It took a while for it to win people over, however. Some of the reasons for this were its simplicity, its user-friendliness and its lack of a charge for its services. WhatsApp
